Stone Stops: \$4 Each

(Bump ring color may vary).

Stone Bump Stops: Quick and easy, for tool-free use with *any* WE guide rods, above and/or below the sharpening stones.

Preset stops to limit the sharpening stone's slide range. To better direct your sharpening effectiveness. Helps prevent unexpected knife blade damage caused by stones sliding down below or up over the knife edge while gliding along the guide rods.

Position lower stops to support sharpening stones while leaning against bevels for more consistent angle cube readings and better resulting bevel angles.

Stone Stops – User Recommendations:

Lower stops (2) only for standard 8” guide rods

Upper/lower stops (4) recommended for rods > 10”

Stone stops let you preset the upper and lower stone stopping position, on your guide rods, to prevent unexpected scratches and damage to the blade steel and knife edge.

The upper stop prevents the stones from sliding too far up the guide rods then off the knife edge. The following downward stone stroke collides down onto the bevel!

The lower stop prevents the stone’s top edge from sliding too low down the guide rods below the knife edge where it may scratch the knife sides. This is often done inadvertently while sharpening.

Stone and Strop Covers

Keep your mediums clean and protected from cross contamination and dirty storage environments.

WE Strop/Stone Covers

For W.E. paddles and mediums

[Return to Index](#)

Wicked Edge Expert Corner Group: Accessories Catalog

Strop Covers (Black):

These slide on protective Strop covers are intended to provide protection from grit abrasive cross contamination of strops but can also be used on WE Diamond/Ceramic and glass/lapping film paddles, to keep them clean if stored in a dirty shop environment.

Price: \$3 per individual strop cover

[Return to Index](#)

Wicked Edge Expert Corner Group: Accessories Catalog

WE Tall-Stone covers (blue) \$4 each

Easy, slide-on protective individual covers. To be used with any Wicked Edge medium requiring a taller stone cover. These will fit the taller aftermarket whetstones, waterstones and other plated abrasive mediums, (e.g. CBN & DRM)

Wicked Edge Expert Corner Group: Accessories Catalog

Covers for 1” x 4” and 1” x 6” plated mediums*

\$3 each

*We are building the available collection with each new request

1 x 6 and 1x 4 plated medium covers \$3 each*

Custom orders: Stones, Stropps and Plated Medium Covers:

Must provide original physical stone or strop. Covers designed to fit that exact Brand Name and type of medium. Stones returned with covers.

[Return to Index](#)

Wicked Edge Expert Corner Group: Accessories Catalog

\$30 for first custom design and printing. Includes 4 new covers, returned original medium and postage.

\$3 each additional individual cover.

We will build the design collection with orders.

Non-Magnetic Stone Adapter

Non-Magnetic Stone Adapters \$20 each

Non-Magnetic Stone Adapters: Complete, easy, ready to use, strap-on adapter. Allows the use of a magnetic digital angle device with non-magnetic sharpening and polishing mediums on any Wicked Edge handles, (any thickness). Useful with whetstones, ceramics, lapping and/or convexing films, and strops.

Wicked Edge Expert Corner Group: Accessories Catalog

Finger Guards (safety shields):

Finger Guards: \$8/pair

An easy-to-use, slide-on, physical barrier *safety shield* between your fingertips and a Wicked Edge sharpened knife. Compatible with all W. E. and Uni-Handles.

Finger guards simply slide down over stones and ride with the stones as they glide up and down the guide rods. Shields work in conjunction with stone stops.

Finger guards also enhance lateral stability to help provide consistent, full, flat stone contact against knife edges.

Wicked Edge Expert Corner Group: Accessories Catalog

Big Wheel Adjuster Knobs for Gen 4 Pro:

\$9 for the pair

[Return to Index](#)

Wicked Edge Expert Corner Group: Accessories Catalog

These larger snap-on knobs allow you to tighten the screw in the rear of the adjuster so there is more tension on it to allow you to move the adjuster with ease but in a more controlled manner. This allows faster angle setting with less repeated back and forth movements to get angle exact. Just pop off the WE provided plastic covers and push on the Big Wheels!

\$9 for the pair

USB Microscope User's Kit:

Scope User's Kit \$16

USB Microscope User's Kit for "Plugable USB 2.0"*

*(see: Amazon or eBay)

[Return to Index](#)

Wicked Edge Expert Corner Group: Accessories Catalog

Microscope User's Kit: provides protected ready access to focus ring and shutter discharge. Avoid constant re-focusing at high power. Lens shroud cover provides glare shade, knife edge cut protection, improved bevel position and hold, w/indexing notch. **\$16/Kit**

Dust Boots (older models):

Dust Boots \$4 each

Wicked Edge Expert Corner Group: Accessories Catalog

Dust Boots: *preserve* roller ball guide rod swivels. Notched and tapered to tightly fit down over guide rod ball ends to keep knife sharpening dust out, without inhibiting the free rotation.

For any Wicked Edge, *threaded-end* guide rods, with roller ball end swivels, (WE1## and Gen 3 Pro models) *

*(versions for tall or short rod-end sockets, with or without jam nuts).

Dust Boots \$4 each

(for older roller end guide-rod micro-adjuster models)

Wicked Edge Expert Corner Group: Accessories Catalog

WE60/64/66 Pivot Keepers:

The WE60/64/66 utilizes a tiny pivot race bushing and Delrin screw to hold the guide rod ball and allow motion. When the rod is removed for storage, the pivot bushing will fall out and get lost. The units shipped with a tiny white plastic ball in place to prevent loss of the bushing. This is very difficult and inconvenient to keep and not lose it after each and every use. These Pivot Keeper are made of rubbery TPU and stretch then hook over the adjuster locking screws. This way they do not get lost when the rods are installed for use. When removing the rods, just place the keeper in the oval opening and tighten the screw to prevent the loss of the pivot races and use of the sharpener.

\$6/pair

Pivot Keepers installed with guide rods removed.

Riser Blocks:
Improves low angle adjustability. Easy to bolt-on, (hdwe included). Blocks are WE model specific.

\$18. w/hardware (Model specific requires installation)

Riser Blocks: improves WE's working geometry by increasing the height between bracket ball end swivels and clamped knife edges. Improves low angle adjustability to achieve lower bevel angle settings, before needing to use a low angle adapter, (LAA).

Allows more effective use of the sharpening stone's entire length for better stone wear and efficiency.

Bolt-on, removable, accessory. Requires longer guide rods to utilize height advantage.

Uni-Handles

These universal stone holder handles were designed and produced by experienced WEPS users. They provide the same ergonomic feel and user's experience we are used to when using WEPS original stone handles. They were designed simply with function first in mind.

These universal handles allow users with sharpening and polishing mediums from other brands of guided sharpeners and other aftermarket mediums, to utilize those plated mediums, (used in pairs), with any WEPS model.

For:

- 1"x 6" Edge Pro, TSProf, Jende Jig, and Hapstone style, dove-tail end pointed plates.
- 1" x 4" KME style flat ended plated media
- 1" x 6" double-sided handles for (2) plated media
- Jende Round Rod Adapter cleats for 1 x 6 handles

Handle cleats require a hex tool to position and secure plated stones, (tool provided). No tensioning or adjusting. Steel plates are embedded in the handles to allow easy use of magnetic digital angle cubes.

(Uni-Handles can be used with Finger Guards and Stone stops.)

Wicked Edge Expert Corner Group: Accessories Catalog

Ed Kenny Micro-Angle Adjuster Kits:

These screw-in micro-angle adjusters are a direct replacement for all WE130/1## and Gen 3 Pro versions, (any manufacture date).

Consistent, repeated results improve with consistent repeated angle readings and locked guide rod angles. Discerning users may verify to fine-tune micro-angle stone settings with each grit change. This is especially important when using a multitude of sharpening, polishing and stropping mediums, of various thicknesses.

These upgrade kits improve the ease of making and securing micro-angle adjustments. Large knobs and thumb wheels provide precise, tool free dial-in precise angle settings with secure locking, while working with a digital angle cube.

WE130/1## Kit fits both the larger, old-style, squarer shaped, “L” brackets and newer more tapered, compact, mini “L” brackets.

Quick-lock arms allow quick, easy, tool-free, positioning of “L” brackets for gross angle settings.

M-A Screws with SS Knob set \$125

Stabil-Rizer Clamping System Kits: \$120.

This is a screw-on **Wicked Edge** accessory to expand ease and usefulness for all Wicked Edge Precision Sharpeners. The clamping systems provide vertical and lateral support and stability for large, long and flexible knives, while enhancing the low angle range.

The riser block base expands the WE's geometry to enhance low angle adjustability by increasing the height between the guide rod's rotating ends and the clamped knives' edge.

This helps avoid the need to use a low angle adapter, (LAA), so you can clamp most knives directly in the vise.

The *balanced* **Stabil-Rizer Clamping System** easily assembles to improve sharpening ease for full-size Chef's Knives at low bevel angle settings. It provides adjustable tip-end and/or handle-end positioning, stability, and support, where and when it's needed.

Avoid long and large knives, from flexing, or slipping and rotating while in the WE clamp. Stability and rigidity help improve sharpening outcomes for full-size knives.

Stabil-Rizer Clamping System Kits \$120.00*

*Complete kit with hardware, & installation video. No modifications required.

Full product support provided.

Wicked Edge Expert Corner Group: Accessories Catalog

Stabil-Rizer Kits are model specific:

Stabil-Rizer Clamping System Kits are model specific. Each kit includes everything needed to disassemble then reassemble your specific WEPS model with the S-R kit installed. The riser block stays in place all the time. The S-R clamps and support rails can be attached to use just when needed, then easily removed with minimal tools.

Installation video included and product support provided.
